SUMMARY

Driven AI & ML enthusiast eager to join an innovative team as an intern. Demonstrates strong curiosity for emerging technologies and a record of impactful academic projects in generative AI, data analysis, and model optimization. Seeks opportunities to contribute meaningfully, learn from industry leaders, and advance in the field of artificial intelligence.

WORK EXPERIENCE

AI Video Annotator   May 2025 - Aug 2025

Annotated and labeled large-scale video data sets for AI model training, ensuring high accuracy and consistency. Collaborated with the data science team to optimize annotation workflows and maintain quality standards.

PROJECTS

Hotel Management System

(Java, MySQL) A hotel management application that allows input and management of client data, with administrative control.

Library Management System

(Python, HTML5, CSS3, JS, SQLite3) A library management system that records data on books issued and returned, along with additional features to enhance usability.

Audio-to-Image conversion

(Python, API, jupyter notebook) A Tool that can convert a given human audio prompt or words into AI-generated images with remarkable creativity and precision.

Clausewise

(Python, API, gradio) A tool that can extract data from legal documents and simplify it while also giving useful insights about the document.

EDUCATION

2022 - 2026 **Samskruthi College of Engineering and Technology** (GPA: 7/10)
Bachelor's Degree in CSE (AI&ML)

HACKATHONS

Infinity 2024 (CYBERSECURITY) - Participated
NASSCOM (GEN AI) - 1st Prize
Cognitive X Gen AI - 1st Prize

SKILLS

Skills	Python programming, MYSQL, APIs, AI
Soft Skills	Problem Solving, Adaptability, Communication, Teamwork
